➢ District-specific customization of PDS home page, help text, notes/messages and other layout elements
➢ Supports Active Directory/LDAP authentication and single sign-on
➢ Manage available course venues
➢ Manage available offerings (courses, seminars, etc.) and associated schedule
➢ On-line staff enrollment with integrated wait-list management
➢ District office maintenance of enrollment for employees with no on-line access
➢ Email notification for enrollment, offering changes, etc.
➢ Instructor on-line access to schedule, class rosters, class attendance
➢ Robust and flexible security model
➢ Supports non-district (guest) access
➢ Shared administration with other QSS web applications, such as Employee Self Service (ESS)

Professional Development Integration

➢ QCC instant connect
➢ Human Resources
➢ Cloud based resources (Google maps, etc.)

Customer Benefits

The Professional Development System is an on-line system designed to assist the district in organizing, managing and tracking the various career-related opportunities available to district staff.

District staff can self manage their access to available courses with appropriate security and approvals reducing the need for paper forms and tedious manual work.

Summary

The QSS/OASIS Professional Development System is designed to meet the <u>specific needs</u> of school districts and county offices of education. A tight integration with the other elements of the QSS/OASIS Application Suite ensures seamless and immediate access to HR data for the appropriate management and delivery of career-related opportunities for district employees.
